

### **Resilience Allowance Endorsement**

If the "Declaration Page" shows that the Resilience Allowance Endorsement applies and if an element or elements of the building envelope of the "Dwelling" or Detached Private Structure insured by the policy to which this endorsement is attached are damaged or destroyed due to direct physical loss or damage caused by the perils insured against, under this policy, we will contribute up to \$5,000 or as indicated on the "Declaration Page", in aggregate during any one policy term, towards the cost of upgrading the item(s) of building material that was damaged or destroyed with building material that is more durable and better able to endure climate related activity.

All other terms, definitions, exclusions, and conditions of the policy to which this endorsement is attached apply and remain unchanged.
